

Parthasarathi Adhikary

B.Tech CSE, SRMIST Chennai / Kolkata, WB / Long Investment Banking & Quant Research

Currently building at Xenodochy — founding-team member, unpaid · Participated in Smart India Hackathon 2026

I build things at the intersection of machine learning and market behavior — then check my own work hard enough to find the bug before someone else does.

01 — SUMMARY

The Thesis

Second-year Computer Science Engineering student at SRMIST Chennai with a quantitative and analytical focus spanning machine learning, statistics, and applied finance.

Proven ability to design, debug, and validate ML pipelines end-to-end — including diagnosing subtle methodology errors such as data leakage. Builds projects at the intersection of technology and finance, from behavioral micro-investing to market-trend prediction, backed by foundational programming, UI/UX, and rapid-prototyping skills.

Looking to apply this blend of technical rigor and financial reasoning in real-world, deadline-driven settings.

02 — ACADEMIC RECORD

Metrics

9.23	8.91	9.07	2028
Semester 1 GPA	Semester 2 GPA	Cumulative CGPA	Expected graduation

03 — POSITIONS TAKEN

Holdings

XNDC · Live FOUNDING TEAM · UNPAID Xenodochy A holding-company concept built with friends — the Alphabet to our Google: an umbrella structure meant to sit above a portfolio of future ventures rather than run a single product. - Founding-team member, currently unpaid - Still early-stage and actively evolving IN PROGRESS
SIH26 · Live SMART INDIA HACKATHON 2026 Safara — Tourist Safety System A tourist safety monitoring system with DID-based digital identity, geo-fencing, and a blockchain audit ledger, built for SIH 2026. - Handling backend development and business strategy for the team - PWA frontend, currently in prototype development IN PROGRESS
NDGV · 2026 PINTECH · CONCEPT & PITCH NudgeVest Behavioral micro-investing platform combining loss-aversion and temporal-discounting framing with ML-driven personalization. - Contextual bandits and Thompson Sampling for adaptive nudging - XGBoost / LightGBM with SMOTE for user propensity modeling - Monte Carlo simulation and CAGR backtesting against the Nifty 50

Titanic Survival Prediction

Full ML pipeline with feature engineering, including a custom Family Survival feature.

- Logistic Regression, SVM, and Random Forest ensemble
- Found and fixed a data leakage flaw in cross-validation
- Replaced naive random splits with group-aware splits on family/ticket clusters

StockPulse

Pattern-based ML and regression model built to identify stock market trends.

- Prototyped with Google AI Studio, VS Code, and Figma
- Regression-driven trend identification on market data

ElderlyAI

Assistive AI tool prototyped for medical monitoring and support of senior citizens.

- Built on Replit and Antigravity

MedicareAI

Streamlined hospital billing workflow concept aimed at cutting administrative overhead.

- Workflow design for billing efficiency

Personal AI Assistant

Personal-use AI assistant built to support independent study.

- Built on Google AI Studio

Positions

PROGRAMMING	Python, C, C++
ML & STATISTICS	scikit-learn, XGBoost / LightGBM, ensemble methods, cross-validation design, probability & statistics for ML
APPLIED FINANCE	Monte Carlo simulation, CAGR / backtesting, portfolio strategy fundamentals, Excel-based modeling
WEB & DESIGN	HTML, CSS, UI/UX in Figma
RAPID PROTOTYPING	Google AI Studio, Replit, Claude, Antigravity

Education

B.Tech, Computer Science Engineering

Expected May 2028

SRM Institute of Science and Technology, Chennai — 2nd Year, 3rd Semester

Sem 1 9.23 Sem 2 8.91 CGPA 9.07

CBSE Senior Secondary (Class XII)

April 2025

Delhi Public School, Ruby Park, Kolkata

CBSE Secondary (Class X)

April 2023

Delhi Public School, Ruby Park, Kolkata

Coursework & Hackathons

Advanced UI/UX Workshop

TEXUS 2026, SRMIST Ramapuram

Advanced UI/UX Applications

Dezprox

Hackathon Participant

Pratyusha College of Engineering

Smart India Hackathon 2026

SIH25002 — Safara, tourist safety system

Introduction to Artificial Intelligence

IBM SkillsBuild

Python using AI

AI for Techies

Probability & Statistics for Machine Learning and Data Science

DeepLearn.AI

Applications of Nanotechnology
